

PROJECT BASTIA

Building **A**ccessible and **S**ustainable **T**ransportation for **I**ncreased **I**ndependence in **A**rizona

BASTIA will help you develop and implement a transportation pilot model for the needs of people with developmental disabilities (DD) living in smaller Arizona communities.

We are looking to partner with an Arizona city or town to create positive community solutions for transportation needs for people with DD.

What does your community need?
We want to work with you to identify strengths, existing resources, and collaborations.

Shared Rides? Van-Pool? Time banks? Volunteer drivers?

Transportation Travel Training? -- We want your ideas!

If you currently live in a community with 82,000 people or less and want to work with us to develop a community transportation solution for people with developmental disabilities
